Dear Nevada State Board,

I am a long time client of therapie as a client who specifically requests healthy breast massage! Had i never had these sessions i would never have been able to loosen scar tissue & receive much needed care after recovery. It is important to have the access to the area around the breast for other cancer patients recovery, it has been an important part of my recovery pre surgery & now that i have had surgery i will be needing to return to therapies for more breast health assistance from professionals. While i understand you thoughts to protect patients if i request i, & sign waiver for it why would you want to keep a life helping treatment from me???? The services they provided for the breast and healthy breast is a necessity & i have recommend this service to a multitude of friends & family who have been able to have this much needed attention to breast health. This new ruling seems to me as an ATTACK on women's health rights specifically!!! we as women request this breast massage to open the lymph that goes all above & around breast tissue as it gets constintantly crushed by bras & stagnant lymph around the breast is dangerous.

Why on earth would you want to take away life changing natural health modalities from women???

Once i am recovered from surgery in 2 weeks, as an adult, i would expect to be able to return to the sessions i need for my breasts to stay healthy after such medical trauma and i need therapie & breast massage for this! If i opt for undraped massage of my breast that should be my choice. I will support therapie in any & every way that i can as a survivor in NEED of these valuable sessions to heal properly.

Leave women's health alone!!!!

It should be a women's choice how her breast are treated & healed ... not yours to restrict.

Thank you

Ali Goida
